Stair-PRO®

stair chair

Stair-PRO[®]

stair chair

As a medic you are relentless. And in your relentless pursuit for optimal patient care, you are faced with unique challenges patient handling in stairways is a challenge you may face on any given call. The strain on your back from lifting and lowering patients down stairs can add up over time. With 1 in 4 EMS workers suffering a career-ending back injury within the first four years of employment, it is clear you need an option to reduce this risk¹.

Each patient handled in a stairway can pose a risk for caregiver injury. Stair-PRO puts the power to help reduce that risk back in your hands. Stryker's Stair-PRO stair chair – **it's a powerful thing.**

Key features:

Compact folded depth

Easy-to-fold functionality allows the chair to fold to a compact size for convenient storage in existing vehicle compartments.

Locking rear lift handles

Length and placement optimized for up stair mobility.

Stair-TREAD System

Allows operator to control movement down stairs without lifting which may help reduce the risk of lower back disorder. The dual treads, made with Kevlar[®], stand up to tough use and assist descent.

Dual wheel locks

Stable patient transfer.

Upper Control Handle

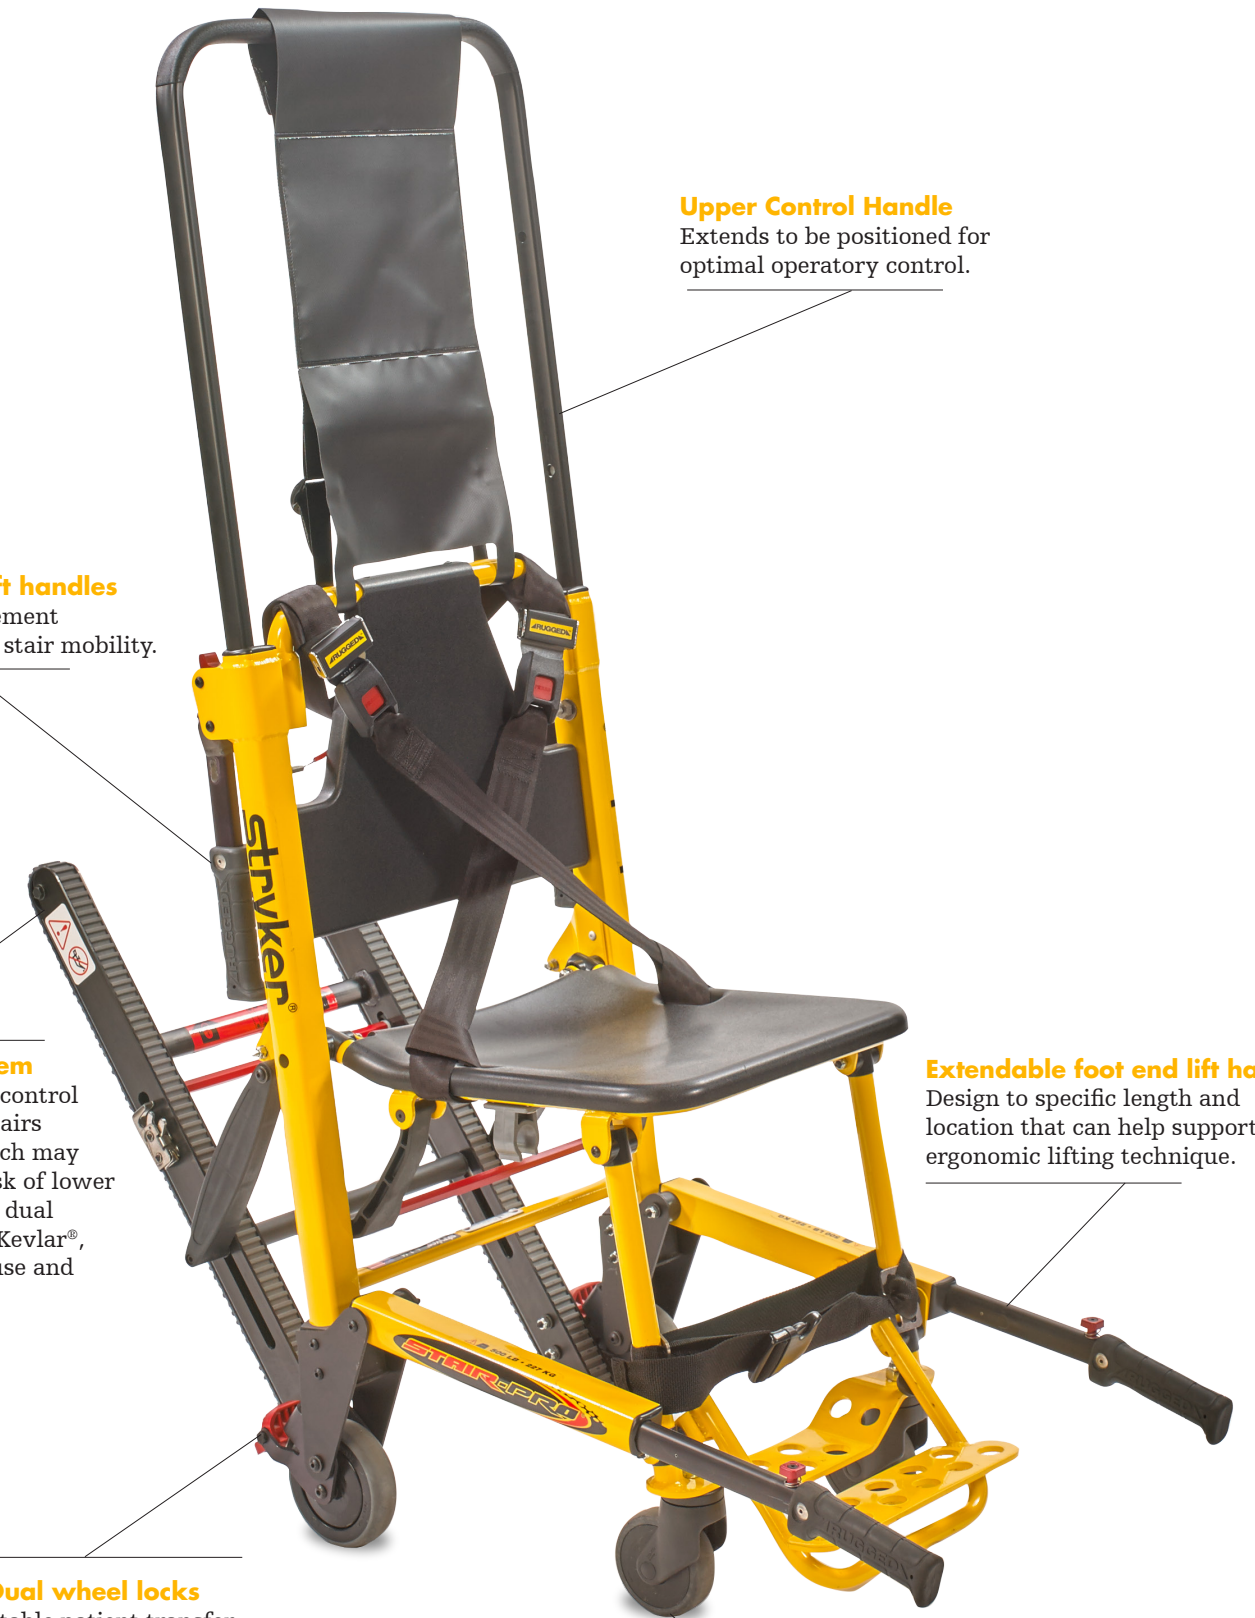

Extends to be positioned for optimal operatory control.

Extendable foot end lift handles

Design to specific length and location that can help support ergonomic lifting technique.

Four-inch front caster wheels

Enable wheelchair-like mobility and maximize maneuverability in tight spaces.

Optional accessories:

O₂ Holder

Foot Support

IV Clip

Vinyl head support

Specifications¹

• Models	6252	
• Height	37.5 in	(95.25 cm)
• Width	20.5 in	(52 cm)
• Depth²	28 in	(71 cm)
• Folded Depth	8 in	(20 cm)
• Weight	32.8 lb	(14.9 kg)
• Maximum Load³	500 lb	(228 kg)

¹ Dimensions are measured from the outermost edges of the main frame. Specifications are rounded to the nearest whole number. Conversions are calculated before rounding.

² Depth dimensions are measured with extendable handles retracted.

³ Maximum load capacity is total weight distributed in accordance to basic human anatomy. EMTs must consider the weight of the patient, equipment and accessories when determining the total weight on the product.

⁴ Patient restraint set includes two cross-chest restraints and one ankle restraint. Cross-chest restraints can also be used in a chest and lap restraint configuration.

In-service video included with every order.

Stryker reserves the right to change specifications without notice.
